DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 6 rejected under 35 U.S.C. 101 because the claim is directed to neither a “process” nor a “machine,” but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 6 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As claim 6, the limitation such the apparatus and method steps in a single claim is vague and indefinite because it is unclear what the claim is constituted for. See, In Ex parte Lyell, 17 USPQ2d 1548 (Bd. Pat. App. & Inter. 1990).

Allowable Subject Matter

1. Claims 1-5 and 7-10 are allowed.

Art Unit: 2665

2. The following is a statement of reasons for the indication of allowable subject matter:

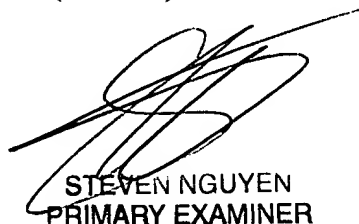

As claims 1 and 7, the prior arts fail to disclose a method and switch comprising designated slower rate is a constant periodic rate which is slower than said corresponding input line rate, said designated slower rate is set so that arrival of said outputted stored data at said external line sections is at a rate not greater than said output line rate and buffer overflow and output overflow are prevented within structure of the claims.
